Formwork system for manufacturing ceiling elements

Transverse formwork BQS

Formworks & Magnets

made in Germany
Transverse formwork BQS

A great variety of different versions, tailor-made for your production, are brought to life by us. The extruded HDPE base profile is furnished with reinforcement slots in accordance with your specifications and prepared for fastening to the pallet with holding magnets or end sheets. We will develop the ideal solution for you, automated for a high level of convenience or designed for products that are often changed and that are produced in low batch quantities.
